FEE BASIS HIPAA 5010
[FB*3.5*121]

INSTALLATION GUIDE

Pre/Post-Installation Considerations:

The post-install routine FBXIP121 will remove the security key FBAASUPERVISOR from the FB FPPS TRANSMIT option. Users that queue this report do not always have the key which prevents the data from being transmitted in a regular manner to FPPS.

The FB FPPS TRANSMIT option should be queued to run nightly. See the installation steps for details about timing of the nightly job. The FB FPPS TRANSMIT option should be queued to reduce the dependence on the interactive menu option. This ensures that payment records are sent from all facilities on a nightly basis.

Installation Instructions
------------------------ -----
Users may be on the system during installation. If installed during the normal workday, it is recommended that the following selections in the OPTION (#19) file, and all of their descendants be disabled to prevent possible conflicts while running the KIDS Install. Other VistA users will not be affected.

 Fee Basis Payment Message Server [FBAA PAID SERVER]

 Install Time - less than 5 minutes

1. Choose the PackMan message containing this patch.

2. Choose the INSTALL/CHECK MESSAGE PackMan option.

3. From the Kernel Installation and Distribution System Menu, select the Installation Menu. From this menu, you may elect to use the following option. When prompted for the INSTALL enter the patch **FB*3.5*121**.

    a. Backup a Transport Global - This option will create a backup message of any routines exported with this patch. It will not backup any other changes such as DD's or templates.
    b. Compare Transport Global to Current System - This option will allow you to view all changes that will be made when this patch is installed. It compares all components of this patch (routines, DD's, templates, etc.).
    c. Verify Checksums in Transport Global - This option will allow you to ensure the integrity of the routines that are in the transport global.

4. From the Installation Menu, select the Install Package(s) option and choose the patch to install.

5. When prompted 'Want KIDS to INHIBIT LOGONs during the install? YES//' answer **NO**

6. When prompted 'Want to DISABLE Scheduled Options, Menu Options, and Protocols? YES//' answer **YES**

7. When prompted 'Enter options you wish to mark as 'Out Of Order':' Enter the following option: **FBAA PAID SERVER**   Fee Basis Payment Message Server

   When prompted 'Enter options you wish to mark as 'Out Of Order':' press <return>

8. When prompted 'Enter protocols you wish to mark as 'Out Of Order':' press <return>.

9. If prompted 'Delay Install (Minutes): (0 - 60): 0//' respond **0**.

Post-Installation Instructions:

The post-install routine FBXIP121 will remove the security key FBAASUPERVISOR from the FB FPPS TRANSMIT option. Users that queue this report do not always have the key which prevents the data from being transmitted in a regular manner to FPPS.

Once the patch has been successfully installed you may delete the post install routine: FBXIP121

1. Ensure that the FB FPPS TRANSMIT option is queued to run on a nightly basis.
   NOTE If your site is already running this task nightly, then no action is needed.

   **Otherwise, schedule FB FPPS TRANMIT per FB*3.5*61 SEQ # 58: **
   The Transmit Invoices to FPPS [FB FPPS TRANSMIT] option should be scheduled to run on a daily basis at a local time that is equivalent to 23:00 Central Time. This timing will transmit payment confirmations to FPPS shortly after they have been received from the AAC, but before FPPS runs its daily job to generate HIPAA 835 remittance advice transactions.

   In a Cache terminal session perform the following:

```
VAH>D ^XUP
Select OPTION NAME: XUTM MGR        Taskman Management
Select Taskman Management Option: SCHedule/Unschedule Options
Select OPTION to schedule or reschedule: FB FPPS TRANSMIT

                        Edit Option Schedule
    Option Name: FB FPPS TRANSMIT
    Menu Text: Transmit Invoices to FPPS           TASK ID: 2944531
-------------------------------------------------------------------
  QUEUED TO RUN AT WHAT TIME: APR 30,2011@23:00

DEVICE FOR QUEUED JOB OUTPUT:

 QUEUED TO RUN ON VOLUME SET:                        (e.g. backups).

     RESCHEDULING FREQUENCY: 1D

            TASK PARAMETERS:
```

```
          SPECIAL QUEUEING:

   ----------------------------------------------------------------
    Exit      Save      Next Page      Refresh

   COMMAND: SAVE                           Press <PF1>H for help   Insert
```
